

INNOVATIVE CONVERTING

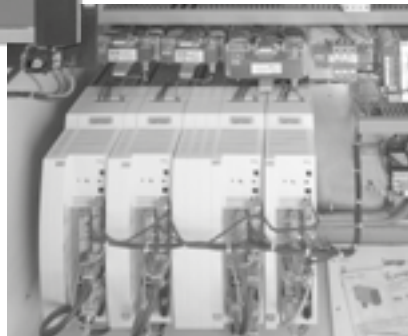

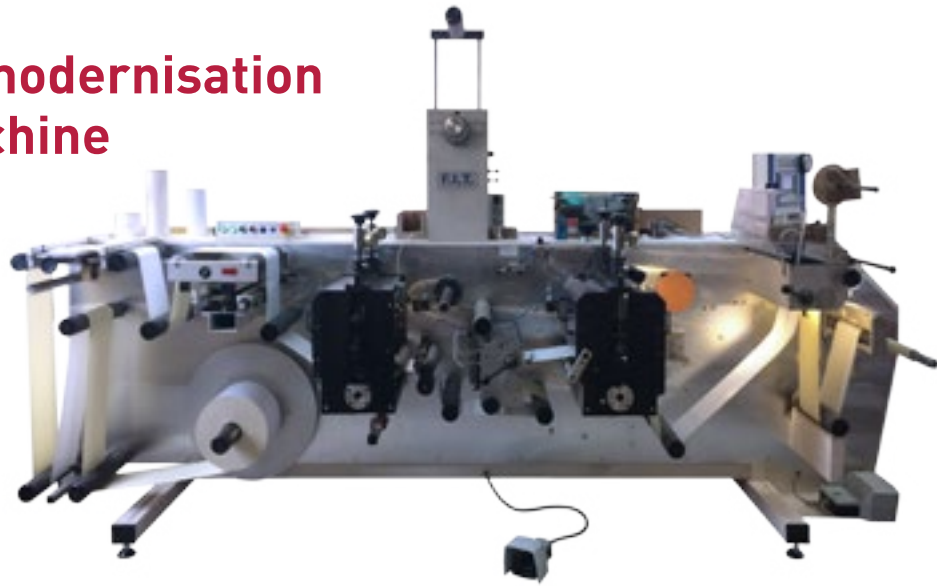

EMR

Extension · Modernisation · Reconstruction

for example modernisation
of a F.I.T. machine

Machine with outdated
control and drive technology

Updated human-machine-interface
and latest electronics

EMR

**Extension,
modernisation,
reconstruction:**

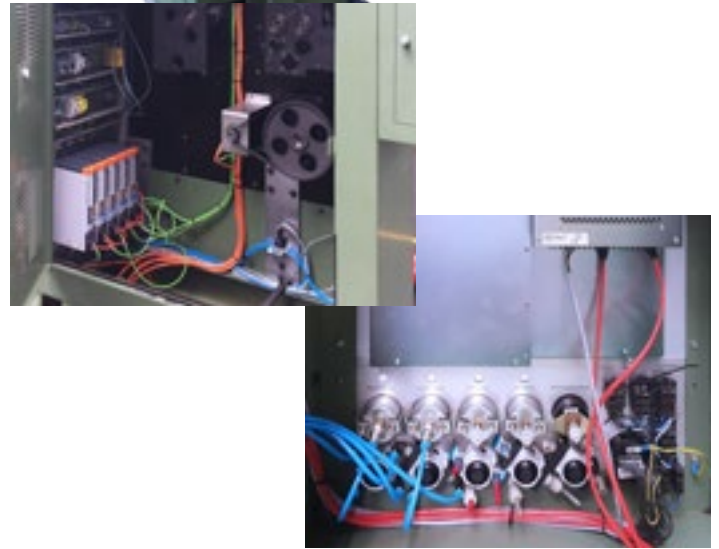

- + Individual adjustment and modernisation to existing machines
- + Possible for every common converting machine

Service and support

**Remote maintenance,
technical field service and more:**

- + We make sure to give you all the needed after-sales support
- + From support via phone to technical service at your production plant
- + We are here for you

for example modernisation of a Rotoflex machine

Machine with outdated control and drive technology

Revised machine with a new HMI and latest technology

Example Retrofit

Modernisation of an existing machine

- + Modernisation of the winding and drive technology
- + Modernisation of the control and automation technology
- + Modernisation of the interface elements
- + Extension of the functions
- + Conclusion: a machine which is viable for the future and state of the art

Use of Retrofit and EMR

- + Extension of the machine life
- + Supply for spare parts is ensured
- + Manufacturing output is ensured
- + Product quality is ensured
- + Machine efficiency is ensured
- + The machine is embedded in the digital environment

You got the challenge – we got the solution
F+V lives by the cooperation with its customers

We are Converting.
